

"Die Vogelstimmen Europas, Nordafrikas und Vorderasiens"
(The Birdsongs of Europe, North Africa and the Middle East)
Dr. Andreas Schulze

By far the most comprehensive sound collection of the birds of the Western Palearctic, and the only one covering the Middle East!

17 Audio-CDs with 2817 recordings of 819 species, with 64-page booklet (in German). Playing time 19:20 hours.

This exceptional edition includes 17 Audio-CDs with 2.817 sound recordings of songs, calls, and other signs of 819 bird species. Never before were the birdsongs of Europe, North Africa, and the Near East presented in such quality and entirety.

The birds are systematically arranged by zoology, similar kinds can thus be compared easily. Each bird species has one to five separate, consecutive titles. This novelty enables to choose the calls separately from the songs, for example, which in practice brings obvious advantages.

The 64-page booklet explains the sound recordings in german, the starting time of each recording is noted. In the registry, the german and scientific (latin) bird names offer a quick and specific access to over 19 hours (19:20) of listening experience.

The recordings are derived from the following archives: Jean C. Roché, Claude Chappuis, Karl-Heinz Dingler, Dr. Andreas Schulze, Alfred Werle, Krister Mild, Guy Gibbon, Boris Veprintsev, Pavel Pelz and other.
